

Legislation NOT Initiated by The APIB

This broadcast e-mail is being sent to all Licensed Private Investigator's in Alabama in response to inquiries received into the APIB office today regarding a recent AL.com article. The article can be found on AL.com at the following link: <https://www.al.com/news/2018/12/from-interior-design-to-physical-therapy-alabama-lawmaker-wants-to-remove-783-job-barriers-for-felons.html>

The legislative plan as detailed in this article has not been reviewed, authorized, or initiated by the APIB. In addition, we have not been approached regarding the unintended consequences of this legislative plan on consumers of private investigation services or the impact on the industry, etc. Obviously, this legislative matter will be discussed by the APIB at the next Board meeting. Again, the legislation being referred to in this article is not authorized or initiated by the APIB.

The APIB will be presenting the exact same housekeeping legislation as presented in the 2018 Legislative Session. As soon as a Bill number is assigned for the 2019 Legislation Session, this housekeeping Bill will be posted at www.apib.alabama.gov and also broadcast e-mailed to all licensees for review and feedback. The APIB's second attempt at housekeeping legislation should in no way be confused with legislation presented by other parties for other purposes. APIB presented legislation will always be posted on our web site and broadcast-e-mailed to licensees.
